Our Mission

To provide highest quality services and solutions to our clients and a productive and innovative environment for our employees to excel in the world of Information Technology.

SasSoft Values

Custom Solutions based on Individual Requirement

SasSoft creates a solution which is optimized to your requirements; Custom by default. Contrast this with one size fits all bundles sometimes promoted by companies that rely mainly on product sales. Because we are vendor-independent, we can select the best-fit solution to minimize your Total Cost of Ownership, and maximize your Quality of Service.

Emphasis on Security

As systems become more complex and serve greater numbers of more mobile users among an organization's vendors, customers, employees and others, effective security becomes an escalating challenge. We bring an unparalleled expertise in secure IT networking to the service of your enterprise, combining proven methodologies and innovative technologies to match your needs exactly.

Quality, Delivery, Responsiveness, Price

We document our goals clearly on each of these crucial parameters and follow processes and standards to measure achievement continually and stay on target. There is no other way to go about it, is what each of us believes. Our high score on the customer appreciation index is a measure of how consistently we are able to deliver on these crucial parameters.

SasSoft – Process & Methodologies

SasSoft follows standard industry process models such as Agile, Spiral (incremental), Waterfall and Rapid Prototyping. Our methodology is determined based on the client's requirement and our vision is to always be a part of the client's success. Based on our vast experience in implementation of quality solutions for various clients, we recommend the Agile model for most projects as it helps reduce risk and time to market.

We have plan documentation templates ready for managing teams and various aspects of software development. Our development process involves planning and documenting specifically for each project aspect such as: Development Infrastructure & environment setup; Development

methodologies; Project team set-up and resource ramp up; Resource management and attrition planning; Delivery management; Software configuration management; Quality management; Performance management; Metrics collection, Analysis & reporting.

Operations Abroad

SasSoft closely works for establishing business setup at India, Australia, USA and Middle East market. Targeted companies are jointly involved in providing various systems and solutions to different economic sectors and are considered as one of the fastest growing and leading solution provider company.
